

The FDA and Center for Disease Control have issued a warning on November 22, 2019 urging consumers in the United States (and Canada) not to consume any Romaine harvested from the Salinas, CA growing region due to potential E. coli O157:H7 contamination.

Ukrop's Homestyle Foods immediately stopped shipping foods that contain Romaine and will not produce any products that have Romaine as an ingredient until it is safe to do so.

For more information about the Romaine Warning, here's the link to the CDC website which provides details.
