

Ukrop's Bakery and Kitchen are peanut-free; however, we are not a nut-free facility, as tree nuts are used in some of our products in these facilities.

As you may be aware, some people are allergic to peanuts, some to tree nuts, and a number to both. We do strongly suggest that you verify your family member's allergy before serving our products.

Our allergen control program ensures that the production lines at Ukrop's Homestyle Foods are cleaned and sanitized between products to prevent allergen cross-contamination. Allergen-containing materials are stored away from the production lines, when not part of the product. And, to ensure we are doing things correctly, we periodically test the lines for allergen residue.
