

Entrée & Sides Heating Instructions

Heating instructions are pre-printed on the sides of all of our entrées and sides that come in our signature "black box." However, supply chain challenges have driven us to implement temporary packaging solutions in certain instances that are not pre-printed.

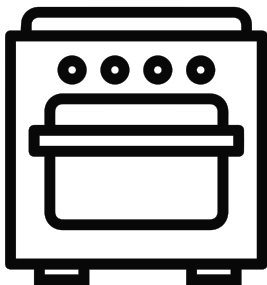

Below represents the proper heating method for ALL items packaged in a paper box or bowl, unless otherwise noted on the product label.

MICROWAVE

Vent corner of film.
Microwave 2-4 minutes

CONVENTIONAL OVEN

Preheat oven to 350°F
Remove film
Bake 20-30 minutes

PACKAGE IS SUITABLE FOR MICROWAVE AND CONVENTIONAL OVEN.
NOT SUITABLE FOR TOASTER OVEN.
